

RPGL -7G

Versatile, Cost Effective, Lethal

Battle proven design assembled with modern technologies.

STC DELTA is proud to introduce you further development of legendary RPG-7 grenade launcher. Due to usage of high grade low weight materials in production of RPGL -7G, we've managed to produce the product which is lighter than original RPG-7 and still achieve tremendous life expectancy of up to 1000 rounds. With compatibility to full range of standard RPG -7 rounds, RPGL -7G is cost effective, high firepower, lethal solution for your troops in today's rapidly changing battlefield environment.

Technical Data:

Caliber – 40 mm
Weight – 5.83 kg
Length – 950 mm
Effective range – 500 m
Max. Range – 1000 m
Compatibility – All standard RPG-7 rounds
Muzzle velocity – 112-145 m/sc
Life expectancy – 1000 launches

Equipment

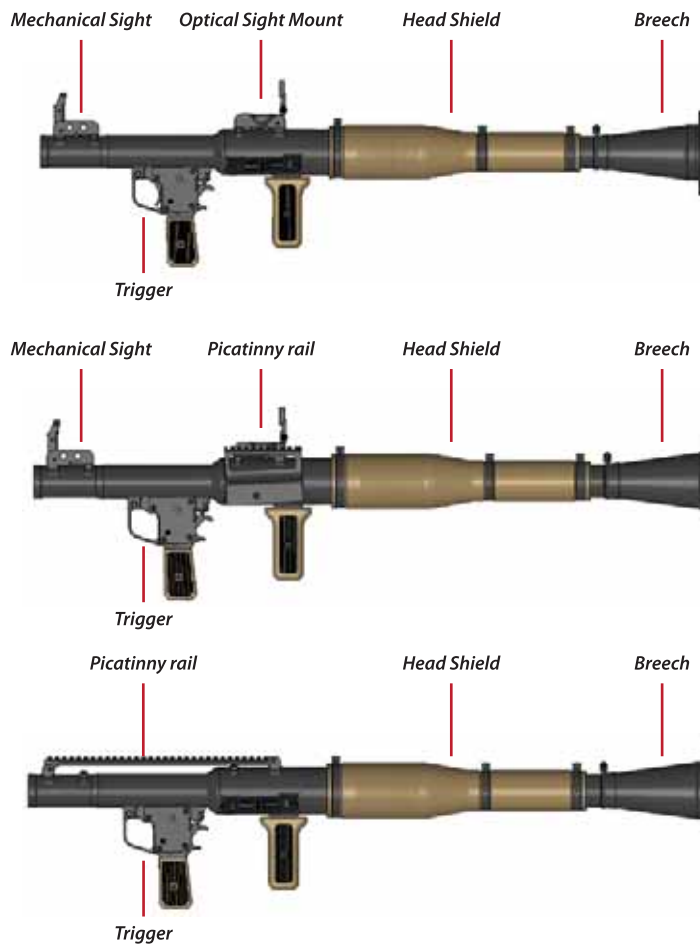

Optical Sight (Optional)

Projectile Carrying Backpack

Holographic Sight
with/without magnifier (Optional)

Key Features

- Battle proven design.
- Cost effective and easy maintenance solution.
- Compatible with all standard RPG rounds as follows and more:

Thermobaric

Tandem HEAT

Single-stage HEAT

Fragmentation

- Low combat weight – 5.83kg depending on modification.
- High life expectancy up to 1000 rounds.
- Several modifications available with standard and Picatinny rail mounts for compatibility with all original/NATO optical, holographic, red dot sights and night vision devices.
